1) Abo, NM 775 points 9 am - 6 pm ABO

Native American trade communities inhabited this once-thriving area of central New Mexico. In the early 1600s, Spanish Franciscans found the area ripe for their missionary efforts but by the late 1670s, the entire Salinas District had been largely depopulated. All that remains today are reminders of this earliest contact between Puebloans and Spanish colonials: the ruins of three mission churches, at Abo, Gran Quivira and Quarai.

Stamp your answer sheet with the Salinas Pueblo Missions National Monument passport stamp available at the desk of the visitor center for the Abo ruins.

The Abo Unit of Salinas Pueblo Missions National Monument is located about nine miles west of Mountainair, on CR B005 less than a mile north of US 60. 34.45010 -106.37477

2) Amboy, CA 2713 points Daylight hours only AMBOY

Amboy Crater stands in the Mojave Desert off the old US Route 66. Estimated to be 79,000 years old and rising 250 ft above the surrounding lava plains, this extinct volcano was a popular sight and stop on Route 66 in the years before Interstate 40 was built.

Take a photo which clearly shows both your motorcycle and Amboy Crater from any convenient point along Crater Road.

Approximately 2.5 mi southwest of Amboy, off Hwy 66. 34.55692 -115.78112

3) Archer City, TX 195 points 24 hours LASTPIC

The Last Picture Show was a 1971 film directed by Peter Bogdanovich, adapted from the 1966 novel of the same name by Archer City native Larry McMurtry. Set in north Texas from Nov. 1951 to Oct. 1952, the film explores two high school seniors coming of age in a declining small town. The film was shot in black and white, unusual for its time, and it earned two Academy Awards. The Royal Theater, featured in the movie, still stands though what's left of it has been converted into an amphitheater (much of the middle of the theater is gone) and when we were there, only three of the letters on the marquee were illuminated.

Take a photo of the blue and white Royal Theater marquee (include the letters spelling ROYAL).

4) Arnolds Park, IA 110 points Daylight hours only SPRIT

The Spirit Lake Massacre (March 8-12, 1857) was an attack launched by a band of Santee Sioux on scattered Iowa frontier settlements during a severe winter. Suffering a shortage of food, Chief Inkpaduta led fourteen Sioux against settlements in the northwestern territory of Iowa; they killed around 40 settlers, took four young women captive and headed north. The youngest of the captives, Abbie Gardner, was held a few months before being ransomed. In 1885, Gardner published her memoir, *History of the Spirit Lake Massacre and Captivity of Miss Abbie Gardner*. It was one of the last captivity narratives written of European Americans being held by Native Americans. The town later erected a 55 foot tall granite obelisk not far from Gardner's cabin.

Take a photo of the side of the obelisk which includes the names of the settlers killed by “the barbarous work that commenced near this spot.”

5) Arthur, NE 549 points 24 hours HAYBALE

The first settlers on the Nebraska prairie found few trees here, necessitating a search for locally available construction materials. In other parts of the state, the soil proved suitable for dugouts and sod houses; in the Sandhills though, the soil generally made for poor construction sod. Pilgrim Holiness Church, built in 1928, was constructed of stacked and baled hay with walls 2 ft thick; the church is stuccoed on the outside and plastered on the inside. It's the oldest hay bale church in North America and one of only three known to exist today.

Take a photo of the side of the church which includes the small sign with the church's name, year and construction material. This sign is directly above the door/entrance on Heath Street.

On Heath St, two blocks east of Hwy 61. Note: Use caution on Heath Street as the second block is unpaved and because this is the Sandhills of Nebraska, it's rather sandy. 41.57068 -101.68853

6) Austin, TX 125 points 24 hours AUSBAT

We here at Team Strange are fond of bats, especially giant bats, and Austin is famous for its bat population. It is thought that over 1,000,000 Mexican bats make their home under the Congress Avenue bridge from April to October each year. Each night around 8 pm, people gather all around the bridge to watch the bats take flight for their nightly hunting.

Take a photo of the giant bat Nightwing near the south end of the South Congress Avenue bridge. The outline of the bat must be clearly visible in the photo.

8) Ballinger, TX 370 points 24 hours BALLINX

Erected in 1993, this giant cross southeast of Ballinger near the Colorado River stands 100 ft tall and measures 70 ft across. Above ground, it weighs 50 tons with another 100 tons of material buried for support; it can be seen for miles during the day and especially at night when it’s illuminated with lights. There are also numerous other, much smaller shrines on the grounds surrounding the cross.

Find the stone marker (the coordinates were taken here) by the parking area titled “For all the unnecessarily aborted children who ask Jesus ‘what would I have been’?” To whom is this marker to the unborn dedicated?

To reach the cross, follow the unpaved, unnumbered road off US 83 at the top of the hill (by the two towers) just south of Ballinger; there is a sign for the cross at this intersection. Follow this road about .75 mi and keep left where the road divides. 31.72413 -099.93183

9) Borger, TX 237 points 24 hours ADOBE

In 1865 fifteen miles from this spot, the First Battle of Adobe Walls was fought when Col. Kit Carson and his force of 335 men battled hostile Kiowa, with assorted Apache, Comanche, and Arapahoe warriors. The casualties were three dead with 15 wounded for the Army and Native casualties were estimated to be 60 killed or wounded. Carson had been sent to Texas in 1864 to find and punish, with extreme prejudice, the Comanche and Kiowa who were making life miserable and death a real possibility for wagon trains on the Santa Fe Trail. The First Battle of Adobe Walls would be Kit Carson’s last.

10) Broadus, MT 440 points 24 hours WHITEMAN

The first white man to enter Montana was Pierre de la Verendrye, who arrived in this corner of the state on New Year's Day 1743. Verendrye's party had journeyed southwest from a Canadian fur trading post to investigate Native American tales of the Land of the Shining Mountains.

11) Cawker City, KS 232 points 24 hours SISAL

Frank Stoeber started the World's Largest Ball of Sisal Twine in 1953 and in just four years the giant ball weighed 5,000 lbs and stood 8 ft high. Stoeber gave the ball of twine to Cawker City in 1961 and each August a twineathon is held when additional twine is added by residents and visitors. As of September 2013, the twine ball allegedly weighed 19,873 lbs.

12) Chinle, AZ 1066 points Daylight hours only SPIDER

Canyon de Chelly National Monument once served as a home for Navajo people. In 1863, Col. Kit Carson sent troops to the canyon to defeat the Navajo population within. The resulting devastation led to their surrender and removal (known as the Long Walk) to Bosque Redondo (near Fort Sumner, NM). The monument's distinctive geologic feature, the Spider Rock, is a sandstone spire that rises 750 ft from the canyon floor. It can be seen from an overlook off South Rim Drive about fifteen miles southeast of Chinle.

Take a photo of the Spider Rock from the overlook.

From the parking area, follow the path 200 yards to the overlook and take a photo of the Spider Rock from there. There is a faded interpretive panel at the overlook which could be used (should you need help) to identify the Spider Rock. 36.10407 -109.35663

13) Cleo Springs, OK 240 points 24 hours SODH

At one time thousands of sod houses dotted the plains of North America. A two-room "soddy," built by Marshal McCully in 1894, is the only one still standing in Oklahoma that was built by an original

Butt Lite 7 – Leg 1 - Minnesota to Texas

homesteader. McCully took part in the largest of Oklahoma's land runs when the Cherokee Strip was opened for settlement at noon on September 16, 1893. McCully first lived in a one-room dugout, hollowed out of a ravine bank; he built the two-room sod house in August 1894 using blocks of the thick buffalo grass blanketing Oklahoma's prairies.

14) Deadwood, SD 220 points 24 hours WILDB

In Saloon Number 10 on August 2, 1876, the sniveling coward Jack McCall snuck up and shot Wild Bill Hickok in the back of the head. In Deadwood only a few weeks, Hickok had been playing a lengthy succession of card games and until that day had never before in his life sat with his back to the door.

16) De Smet, SD 145 points 24 hours SURVEY

Charles Ingalls and his wife Caroline arrived in De Smet in 1879 by covered wagon from Walnut Grove MN and bought their first house from a local surveyor. Laura described the house as a "two story mansion" which it must have felt like after living in a mud dugout for a year.

17) Dime Box, TX 141 points 24 hours DIME

The name Dime Box arose from the local practice of leaving a dime in a box at Brown's Mill in order to get a letter delivered 12 miles to nearby Giddings, in the days before a Post Office was opened here. To commemorate this bit of local history and the name it inspired, an oversized Liberty dime is suspended in a transparent case mounted on a stone cairn.

18) Dublin, TX 250 points 24 hours DRPEPP

Dublin Bottling Works was the world's oldest bottler of Dr. Pepper and the only place in the world that still used proper cane sugar to sweeten it. They ceased production in 2010 though the museum to this odd drink (it totally tastes like carbonated prune juice, doesn't it?) remains open. A nice sculpture in front of the building depicts Bill Kloster ("Mr. Dr Pepper") offering a bottle of the stuff to a little girl. Kloster believed in the original formula and was responsible for its continued use after every other bottler had gone over to evil corn syrup. He worked at Dublin Bottling Works for 67 years, from age 14 until the day he died in 1999 after a full day at the plant.

19) Encampment, WY 900 points 24 hours TWOOUT

In 1897, the discovery of a copper ore supply led to the development of the city of Grand Encampment. A smelter supplied by a 16-mile aerial tramway, then the longest in the world, carried 1,000 tons of ore per day from the mine site. In 1908, the copper mining company was indicted for fraud, the mines closed and area towns were abandoned. Encampment survived but the "Grand" was quietly dropped. The Grand Encampment Museum has a number of historical buildings on its grounds, including a two-story outhouse.

20) Evanston, WY 222 points 24 hours MINE

Almy was a coal mining camp in Uinta County near Evanston where in 1881, an explosion killed thirty eight miners in the Central Pacific Mine, marking the first U.S. mine explosion west of the Mississippi River. Another explosion which killed thirteen men in 1886 led to the establishment of the office of state mining inspector, who shut down the Almy mines in the 1940s after finally deeming it too dangerous to mine there.

21) Fort McKavett, TX 245 points 24 hours MCKAVET

The U.S. Army established Fort McKavett in 1852 to protect area settlers, but abandoned it by the end of that decade. In 1868, the fort reopened and elements of the U.S. Army's four African American regiments, the Buffalo Soldiers, used Fort McKavett during the Indian Wars.

22) Fort Sumner, NM 343 points 24 hours BILLY

William H. Bonney (a.k.a. Billy the Kid) was a gunman and frontier outlaw in the Old West. According to legend, he killed twenty one men (perhaps an exaggeration), killing his first at the estimated age of seventeen. Billy the Kid's grave site has long been debated but he is generally believed to be buried behind what is now the Old Fort Sumner Museum.

24) Goliad, TX 494 points 24 hours GOLIAD

An official Texas Historic Landmark, the Hanging Tree of Goliad is a symbol of justice, Texas-style. For 24 years, the court trials of Goliad County were held under this big oak tree. Death sentences were carried out promptly, courtesy of the tree's many handy noose-worthy branches. The tree also served as a gallows for a number of impromptu lynchings during the 1857 "Cart War" between Texans and Mexicans. No record was kept for the number of men who died in The Hanging Tree, but some estimates range into the low hundreds.

25) Grenville, NM 419 points 24 hours SFTRAIL

The Santa Fe Trail stretched some 900 miles from Franklin, MO to Santa Fe, NM. Established in 1821 by William Becknell, the Cimarron Route (or Cimarron Cutoff) was used by Becknell in 1822 when he took the first wagon train to New Mexico. The Cimarron Route was shorter and more suited to wagon travel and it shortened the traveling time by ten days. However, it was considered much more dangerous than the Mountain Route due to the shortage of water and the danger of attack by Native Americans.

26) Hecla, NE 251 points 24 hours HECLA

When the Burlington & Missouri River Railroad reached this point in 1887, it built a siding which became an important shipping point for Sandhills cattle. By the time the general store burned down in 1927 though, the town was already dying. The railroad kept a repair crew in Hecla until 1956 but when the depot and stockyards were removed in 1967, Hecla was no more.

27) Hite, UT 301 points 24 hours HITE

Cass Hite arrived in Glen Canyon in 1883 and, searching for gold, found it in the sands and gravel along the Colorado River. His discovery set off the Glen Canyon gold rush; hopeful prospectors soon followed to the town they named Hite City. Alas, the gold the miners found was all fine gold dust and difficult to recover; mining operations soon ended. In 1964, the rising waters of Lake Powell swallowed up what was once the city of Hite.

Find the interpretive panel titled “Searching for Wealth” at the overlook. According to this panel, what was the name of the Navajo chief who led Cass Hite to the canyon below?

28) Hot Springs, SD 636 points Daylight hours only BATTLE

Battle Mountain Sanitarium opened in 1907 and was built solely as a short-term home for veterans with lung or respiratory problems. Now threatened with closure by the V.A., these historic buildings were designed in a Mission/Spanish Colonial Revival style using local sandstone and remain largely unaltered. Dedicated in 1914, the Battle Mountain Monument is a 32 ft tall obelisk situated on a high point adjacent to the National Cemetery, in the eastern section of the campus.

29) Idaho Falls, ID 555 points 24 hours WG-IDAHO

Whispering Giants are a series of public art sculptures depicting Native Americans and Canadian First People by the Hungarian-born artist Peter Wolf Toth. The artist uses a hammer and a chisel as

Butt Lite 7 – Leg 1 - Minnesota to Texas

the basic tools to create his sculptures. Before starting work on a Whispering Giant, Toth confers with local Native American tribes. The sculpture created is the artist's vision of a composite of all the physical characteristics, especially the facial features, of the local tribe or tribes, infused with their stories and histories.

30) Independence, KS 844 points 9 am - 7 pm ABLE

In the 1930s, the Works Progress Administration built a number of Monkey Islands at zoos across the country. The Monkey Island at Ralph Mitchell Zoo was quite elaborate, with a castle, a main street with storefronts and even a miniature Liberty Bell. This patriotic environment nurtured Miss Able, the first non-communist rhesus monkey to travel into outer space. She was strapped into an American Jupiter rocket and fired 300 miles into the thermosphere on May 28, 1959. Miss Able returned safely to Earth but unfortunately she died the next day during surgery to remove the electrodes implanted to monitor her health during the flight.

31) Iraan, TX 600 points 24 hours OOP

Iraan is the birthplace of the comic strip Alley Oop. The cartoonist VT Hamlin created the mythical caveman Alley Oop and his pet dinosaur, Dinny, and his girlfriend Oola. They all lived in the kingdom of Moo. Later, Hamlin created Dr. Wonmug, who built a time machine and rocket to transport Alley Oop and Oola to the modern world. The comic strip ran in papers around the world for over fifty years and in 1965, Marathon Oil donated seven acres of land to Iraan to build a tourist attraction, a Fantasy Land based on the comic strip's characters.

32) Kearny, WY 310 points 24 hours FETTER

On December 21 1866, a wood-gathering party from Fort Kearny was attacked by Native Americans. A relief force went out to rescue them, led by Cpt. William Fetterman, a Civil War veteran who'd once bragged that "given eighty men, he could ride through the whole Sioux Nation." (Ironically, he led eighty men on that fateful day). Taunted by warriors led by war chief Crazy Horse, Fetterman broke his orders and pursued them into an ambush by a combined force of over 2,000 Sioux, Arapaho, and Cheyenne warriors commanded by Chief Red Cloud; all 81 soldiers were killed. Red Cloud signed The Treaty of Fort Laramie in 1868, creating the Great Sioux Reservation and closing Fort Kearny, but this treaty was quickly broken after the discovery of gold in the Black Hills which eventually led to the Battle of the Little Bighorn in 1876.

La Cueva was a ranching community established by Vicente Romero in the early 1850s. Its proximity to Fort Union and the Sante Fe Trail helped the ranch develop into one of the region's most important commercial centers. The name (the cave in Spanish) referred to the place Romero lived during the construction of his first home; he and his neighbors soon prospered and he built a grist mill here in the early 1860s.

Oatmeal might have been forgotten until 1978 when, as a spoof of the many chili cook-offs in Texas, area residents came up with the annual Oatmeal Festival, a tongue-in-cheek celebration of the once mandatory hot breakfast food.

53) Osawatomie, KS 200 points 24 hours JBROWN

John Brown was a radical abolitionist closely associated with the pro-slavery and free-state struggle of the Kansas Territorial period. Brown followed five of his sons to Kansas in 1855 and seeing an opportunity to help make Kansas a free state, he brought a wagon load of weapons along with him. In May 1856, a small party consisting mainly of Brown and his sons raided the cabins of pro-slavery men, killing five. Up to that time, there had been little bloodshed between pro-slavery and free-state groups; Brown's raid brought retaliation. On August 30, 1856 in the Battle of Osawatomie, five of Brown's men (including one of his sons) were killed and the town burned, earning it the title "cradle of the Civil War". Brown later led the capture of the U.S. Arsenal at Harper's Ferry, for which he was tried and hanged.

Pawnee Rock is a historic landmark on the Santa Fe Trail. It was considered the midpoint of the route between Independence, MO and Santa Fe, NM. The Flaming Fountain is a veteran's memorial which for decades featured a perpetually burning flame fed by natural gas. The fountain is fed by an artesian well which flows into Capitol Lake. A well was first drilled here in 1910 during the capitol's construction and was found to contain natural gas; for decades that gas was tapped to heat the capitol building and supply the fountain's flame. Alas, it seems the natural (i.e. free) supply of gas has been dissipated and the fountain no longer burns regularly if at all, while the state's frugal taxpayers don't appear eager to provide the funding to keep the flame lit.

It’s alleged that only seven white buffalo have ever been shot, one of which was killed near here in 1876. The man who shot it, J. Wright Moore, became so popular as a result that he was able to start a nearby ranch from which the town of Snyder was born. For years the fiberglass buffalo statue in Snyder was of a male. Then someone noticed that the white buffalo’s hide (which is still in the possession of Moore’s family) was from a female. The town quickly raised funds and threw out the fiberglass bull; now a classy-looking bronze buffalo cow marks the spot.
